IDX Instruments Catalog 2025 Designed for Precision. Built Around You.

At **IDX Instruments** by MA Dental, we don't just produce dental instruments. We refine them. Inspired by the clean lines of Scandinavian design and the precision of Swiss engineering, our tools are made to enhance both the quality of care and the daily work of dental professionals.

We believe the best instruments do more than function. They feel right in your hand.

That's why every IDX Instruments product is created with your grip, your workflow, and your patient in mind.

What Sets Us Apart

- | | |
|---|---|
|  Ergonomics, Refined
Shapes that reduce fatigue, improve control, and support lasting performance. Form and function in perfect balance. |  Clear, Streamlined Assortment
The IDX Instruments range is built for clarity. From diagnostics and periodontology to surgery, extraction, restorative work, implantology, orthodontics, laboratory, sterilization and essential accessories—you can find exactly what you need without distraction. |
|  Swiss Steel Craftsmanship
Premium materials forged for sharpness, strength, and durability. Instruments you can rely on day after day. | |
|  Innovation Driven by Practice
Every design begins with your needs. We listen, test, and improve—based on real feedback from real professionals. |  Entrepreneurial Spirit
IDX Instruments by MA Dental is driven by a growth mindset. We bring speed, clarity, and customer-first logic to everything we do—delivering smarter solutions and better value for you. |

Beyond Products – A Partner in Practice

At IDX Instruments by MA Dental, success is measured in your satisfaction. With personal support and flexible private label options, we grow together with our customers. Explore the new IDX Instruments catalogue and discover how premium design, precise materials, and a user-focused approach can elevate your practice.

What **our customers** say about us.

Dr Anil Shrestha

BDS, BSc(Hons), DGD(UK), MGDS RCS(Eng), MSc(Lond), MFDS RCSEd., MFDS RCPS(Glas), FFGDP RCS(Eng), FICD., Clinical Director / Registered Specialist in Prosthodontics - Wimpole Street, London W1G

"Having only ever used premium surgical instruments for the past 20 years, I have very discerning and exacting requirements of my hand instruments to enable me to produce the consistently high quality of work required in private specialist practice. The selection of restorative instruments from INSTRUDENTS IDX complement my usual instruments perfectly; they are in many ways a natural evolution of instrument design, incorporating the comfort of modern silicone handles, near-perfect balance-points, exceptionally comfortable ergonomic design, and quality working tips. The clear and legible labelling on the instrument handles and the distinctive colour coding make the identification and selection of these instruments almost intuitive, a pleasant bonus that my dental nurses really appreciate. My hygienists love these instruments for their daily work too and I look forward to seeing the range of instruments broaden in the future."

Dr. Michail Oikonomou

Greece

Being an aesthetic and restorative dentist means that composite restorations are a big part of my daily workflow. Every dentist needs to find the instruments that make his/her practice easy. I found them from MA Dental with the Non-stick Composite Instruments.

Especially I can complete most of the restorations with Plastic Instrument (Anterior) and Packer-Modeller 10 with great precision and esthetics. Recently I added an Instrudents X Plus model and they seem very comfortable and premium! I really enjoy the ergonomics, the non-stick properties and all the vibrant colors! They provide my dental clinic with color and that also makes my patients more comfortable!

Dr Maria Kocisova MDDr

Associate Dentist | London, UK

"As a cosmetic dentist I do many composite restorations on a daily basis. I enjoy using the IDX composite modelling instruments as they offer excellent non-stick properties that add efficiency to my clinical procedures. These ergonomic instruments have tools on each end, designed to carry the composite resin to the prep, packing it into place and smoothening out the surface. The plugger end is designed to help avoid composite pullback. All are fully autoclavable.

The ergonomic handle rests easily, naturally and comfortably in my grasp. The textured handle surface provides better traction and stability"

Sonja Novovic

Clinic Manager | Falkonertandlægerne | Denmark.

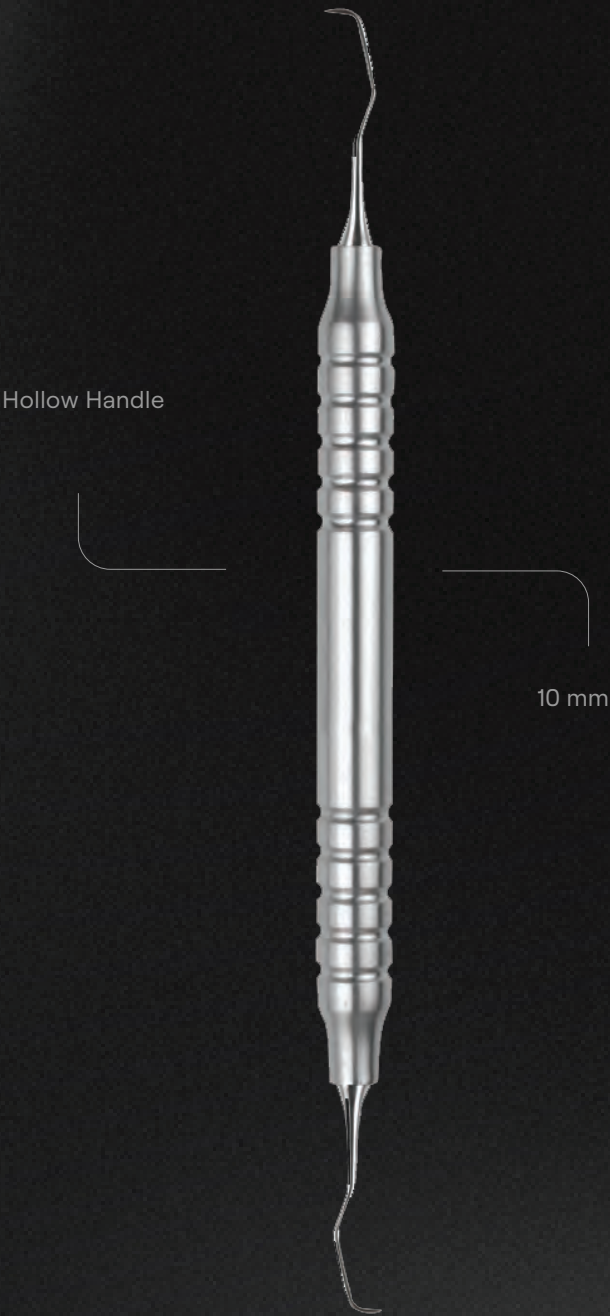

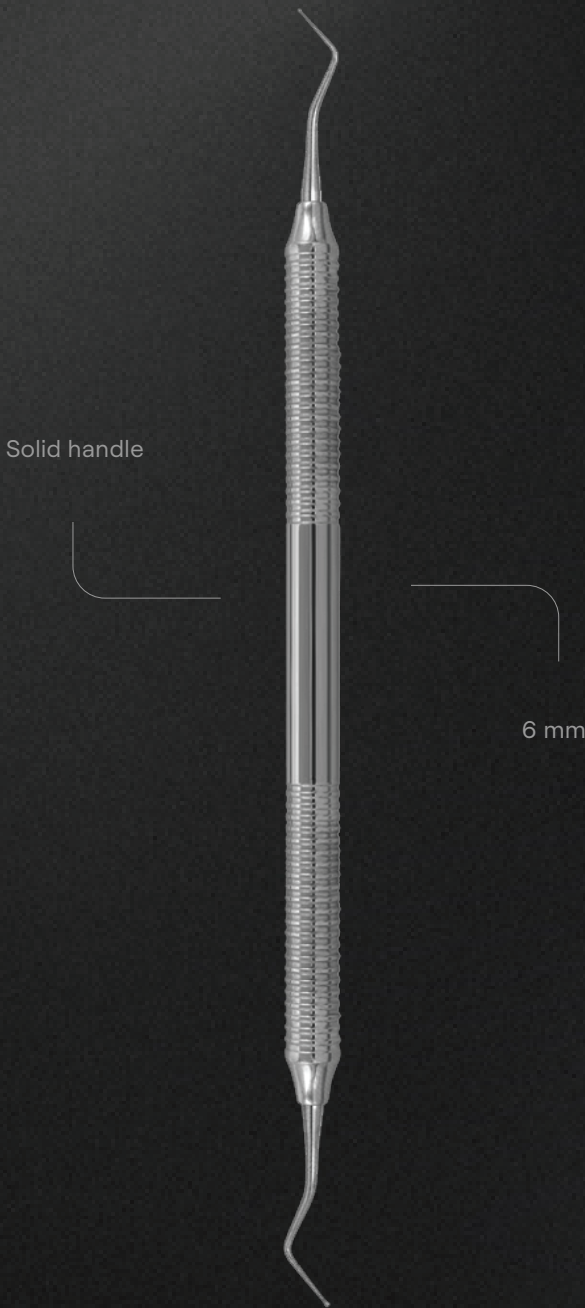

"For the past six years, I've been purchasing MA Dental instruments. I've used a number of their instruments, but my favorites are their surgical instruments, Manage cassettes, and 1 mm probes. Their instruments are of outstanding quality and are extremely helpful during our hectic clinic days.

MA Dental is very flexible in how they work, and they are a great help when I need some particular instrument. It has always been a pleasure working with MA Dental."

Steel Handles

Our steel hand instruments are single-ended and double-ended instruments, produced with high-quality stainless steel with economic prices without compromising on the quality of the instruments.

Steel Solid Handle Classic 6 mm

Steel Hollow Handle Lightweight 10 mm

Titanium oxide coating

Titanium oxide coating is a type of coating that is applied to dental instruments, such as scalers, curettes, and elevators, to improve their performance and extend their lifespan. There are several benefits to using titanium oxide coating on dental instruments:

Corrosion resistance

Titanium oxide is also resistant to corrosion, which means that it can protect the underlying instrument from rust and other types of deterioration. This is especially important in the dental industry, where instruments are frequently exposed to water and other corrosive substances.

Sterilization

Titanium oxide coating is resistant to sterilization processes, which means that it can withstand the high temperatures and chemicals used to sterilize instruments. This makes it an ideal choice for coating dental instruments that need to be reused multiple times.

Smoothness

The smooth surface of titanium oxide coating can help to reduce friction and make it easier to use the instrument. This can be especially helpful in procedures where precision is important, such as when removing plaque or filling cavities.

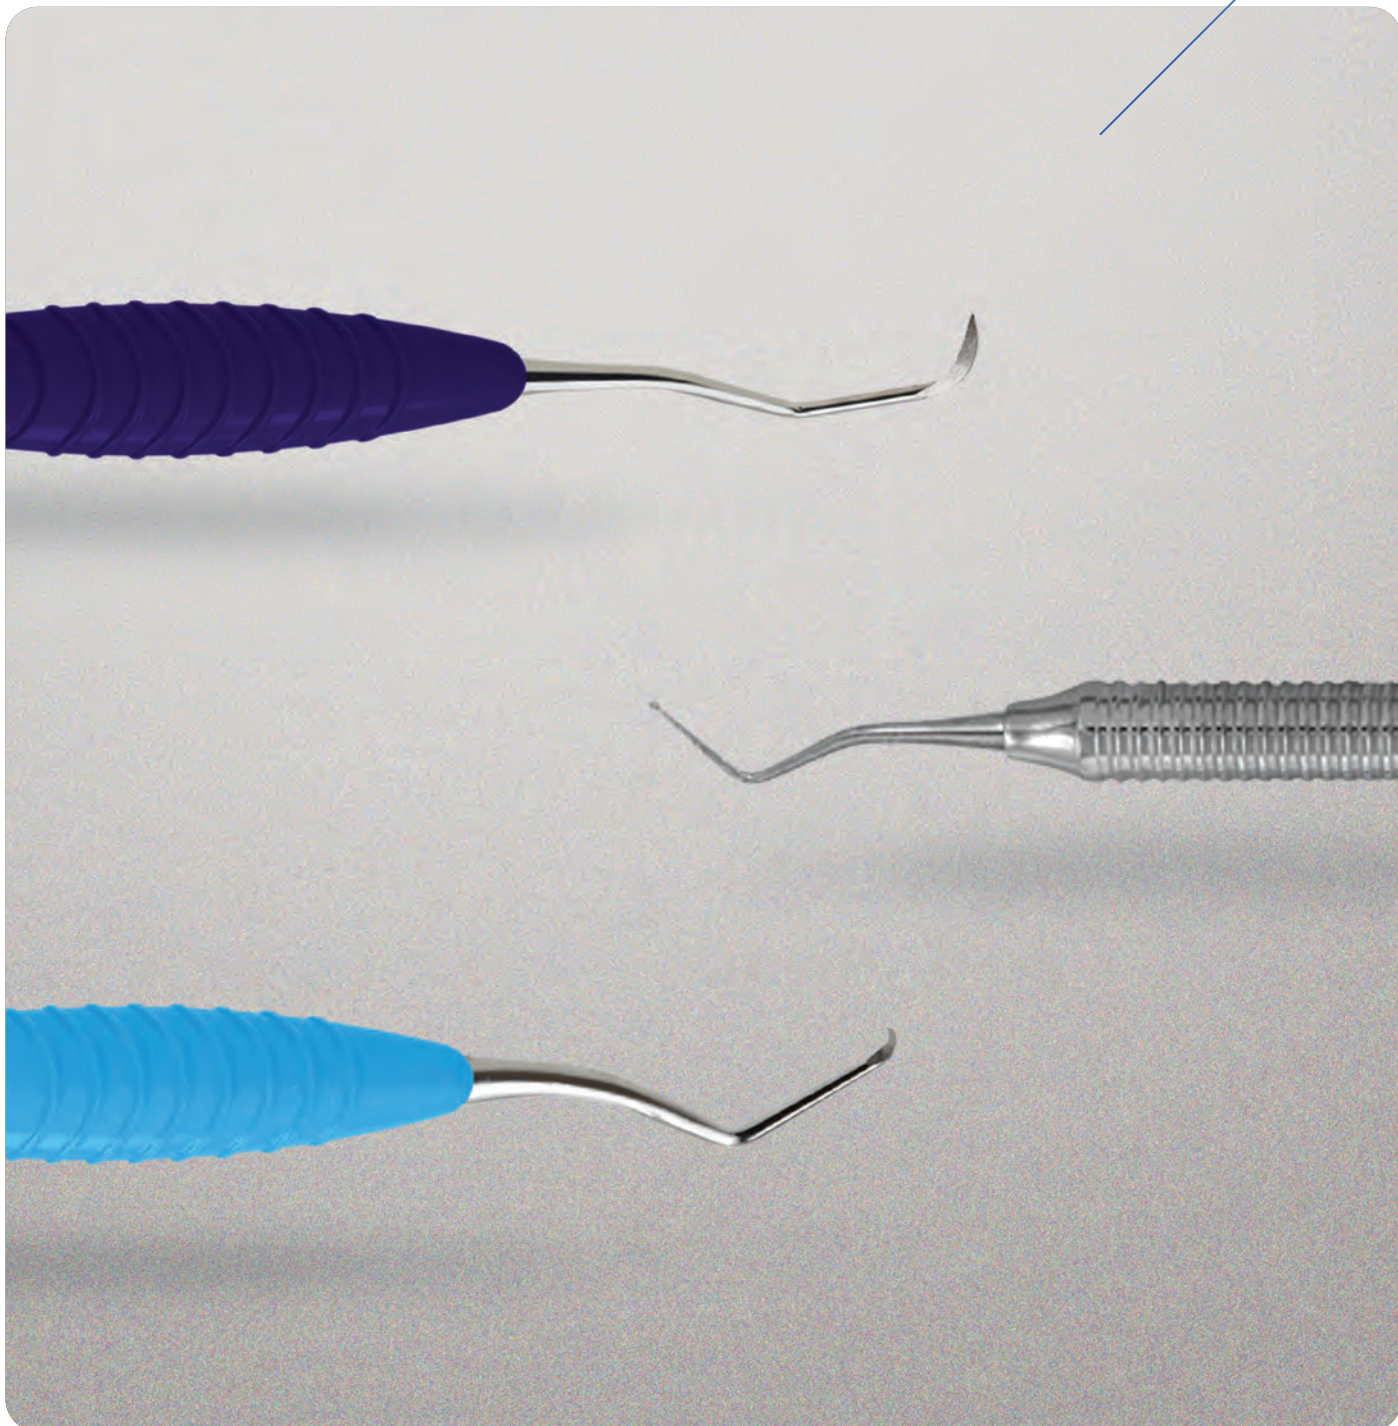

Durability

Titanium oxide is a very hard and durable material, which means that it can withstand the wear and tear that is associated with the use of dental instruments. This makes it an excellent choice for coating these instruments, as it helps to extend their lifespan.

IDX Sharp

IDX Sharp instruments are manufactured with premium quality sharp Swiss steel. Most dental instruments have an HRC rating of 53-51. HRC is the recognized industry rating that defines the sharpness of an instrument. Due to our unique heat treatment, the IDX Sharp has achieved a robust 60 HRC ensuring a supreme sharpness longevity.

All of our IDX Sharp instruments are non-stick & completely sharpen-free. They Sharp instruments have supreme wear resistance and durability and maintain a long-lasting sharpness. IDX Sharp instruments are available in a special black titanium oxide coating that ensures that they are easy to clean, hygiene friendly and give minimal reflection while being used.

Mini

Ideal for scaling deep, narrow pockets

Blade Shark 50% less & 10% thinner

Standard

Ideal for removing subgingival calculus.

Rigid

Ideal for more pressure to be applied.

Thicker, rigid & wider working-end than standard Gracey

Mini Gracey Curettes

Mini Gracey curettes have 3mm longer terminal shank than normal Gracey curettes. The Blade Shank of the mini Gracey curette is 50% shorter and 10% thinner than that of the regular Gracey curette. Scaling deep, narrow pockets with mini Gracey curettes is a smart idea.

Dr. Ammad Jawed.

MCLINDENT(TRAINEE).
NHS, Cardiff, UK.

As an endodontic trainee I spend long hours holding instruments. The IDX instruments are designed ergonomically and I found them very comfortable to use. All the instruments have textured grips so they don't slip easily and provide better handling. The spoon excavator reaches the deeper parts of the cavity and provides more control in removing caries/debris. The non-stick properties of composite modelling instrument saves a lot of time and effort. These instruments come in different colours which makes it very easy to differentiate in the cassette tray and it reduces the overall working time. The cassette has two locking ends which secures the instruments in place and is fully autoclavable. In a nutshell, I had a very pleasant experience with these instruments and I would definitely recommend them to others.

Restoration kits

All-round non-stick compo set IDX 17081

This all-purpose non-stick compo package is suitable for handling a range of fillings. It is very easy to clean these instruments during operations because of the unique titanium material that has been applied to them. Either a Manage-5 (Plastic) or Mini-5 (Stainless-steel) cassette is available with this package.

IDX 12035 | Universal Spatula
IDX 12029 | Mini Spatula
IDX 12028 | Plastic instrument, anterior
IDX 12034 | Burnisher
IDX 12027 | Burnisher & Plugger
1.5 & 2.5 mm

IDM 5001 | Manage5 (plastic)
sterilisation tray

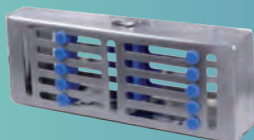

Compo set with small tray
(stainless steel) IDX 17081S

Compo-5 Set IDX 17082

This is an excellent compo-5 package that will protect the most of your restoration treatments. This Compo-5 kit includes five instruments as well as one sterilization cassette. Either a Manage-5 (Plastic) or Mini-5 (Stainless-steel) cassette is available with this package

IDX 12022 | Form Condenser
IDX 12018 | Mini Spatula
IDX 12021 | Plastic instrument, anterior
IDX 12023 | Flow Instrument IO
IDX 13017 | Mini Sickle Scaler

IDM 5004 | Manage5 (plastic)
sterilisation tray

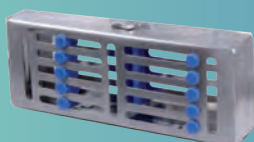

Compo set with small tray
(stainless steel) IDX 17082s

Restoration kits

Super Restoration kit IDX 17091

A perfect super restoration kit, complete with diagnostic, composite, and sickle scaler instruments.

IDX 11018 | IDX mirror handle with mouth mirror
IDX 12001 | Excavator 1.5mm
IDX 11007 | Explorer 23 - Probe CP12 3-6-9-12mm (Ball-end)
IDX 12010 | Burnisher & Plugger 1.5mm - 2.5 mm
IDX 13018 | Micro Sickle scaler 01-02
IDX 12018 | Mini Spatula
IDX 12022 | Form Condenser
2270-1 | Tweezer Meriam, 15cm
2274 | Tweezer Miller, 16cm

Micro Elevators

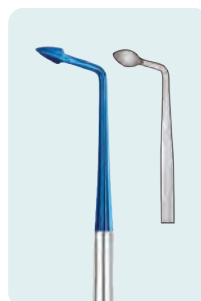

IDX Instruments' new line of Micro Elevators is designed for ease of use, with an ergonomic shape that ensures precise lever insertion into the intraligamentary space. This design minimizes trauma during extractions, promoting faster post-operative recovery. The tips are coated with a special titanium treatment, making them suitable for use in implant procedures as well.

Syringes

The Intraligamentary Anesthesia Syringe delivers anesthetic directly into the tooth ligament, ensuring rapid, targeted anesthesia for the affected tooth without the need for broader area numbing, as with traditional methods.

Intraligamentary Syringe

Product Features

- 45° angled tip for enhanced maneuverability during procedures
- Fine handle with convenient lever dosage for precise control
- Suitable for both upper and lower teeth
- Less traumatic than traditional anesthesia methods
- Minimal anesthetic required: just 0.06 ml per dose

Advantages

- Rapid anesthetic effect
- Eliminates the risk of hematoma formation
- Effective for treating teeth in various positions
- Anesthesia is localized, targeting only the treated tooth.

Turret
X06604

Bone scraper / Replacement

The bone scraper allows to scrape and at the same time to retrieve portions of bone, autologous defined so that it can be immediately reimplanted.

Bone Scraper Curved
X06339

Replacement Blade of Curved Bone Scraper
X063392

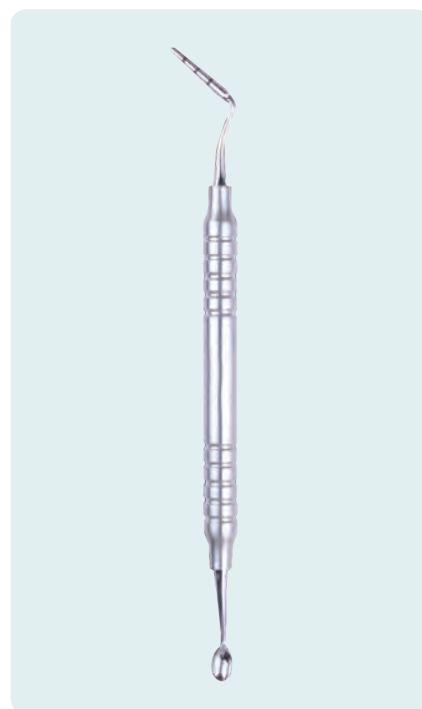

Bone Scraper Straight 15.5cm
X063393

Bone Scraper
X063391

The Bone Scraper has extended working area for bone curettage so that a large volume of bone substance can be obtained. The shortened curved shaft ideally meets the surgeon's needs in handling the jaw under different anatomical conditions.
